“AOC Extends Holiday Cheer to Two Families”

This year, AOC staff spreads holiday cheer in the way of two holiday meals that were sent to two of our families: Mr. and Mrs. John Wright and Elizabeth Baugher. Dinners were provided so that these families could enjoy the holiday season without the stress of cooking and to let them know we were thinking of them this holiday season.

HoneyBaked.com provided holiday ham dinners with all the trimmings to each of these families just in time for the holidays.

Mr. Wright called to say, “This was a wonderful surprise and I thank Dr. Wei and his staff for their thoughtfulness.” Mr. Wrights wife was undergoing surgery, which required that she remain in the hospital for one week.

Dr. Wei states, “This is an excellent way to kick off the holidays and give back to those patients who have chosen me to help take care of them.” He continues, “I wish I could do more and hopefully in the future we can.”

Mrs. Baugher’s holiday day dinner is scheduled for delivery just before Christmas Day. She’s been an AOC patient for more than 21 years.

The Arthritis Research Institute was founded in 1999 providing funding to both traditional and alternative research in arthritis, arthritis patients who are unable to afford their prescribed arthritis treatments, and provides scholarships for children with arthritis.
